About This Content

Hold on tight and get ready for a superlative experience!

With our Laaers Car Transporter, we're setting new standards and introducing one of the most innovative carriers for Trainz A

New Era! Three highly detailed car models are waiting for you to transport on the ultra-modern vehicle, in use in northern europe. You can select each individual car for every space on the transporter - and choose between up to 54 different options - allowing you to personally customize the train.

But it's not just the cargo; the impressive transporter itself creates excitement wherever it goes. The Laaers car transporter is available in two highly detailed versions in orange and red, with attractive textures and sophisticated lettering whose high quality is impressive even in a close-up shot. You can also customise the vehicle itself, thanks to a wide range of options, including 4 levels of cleanliness

Do you like things really dirty, or are you more of a clean freak? Whichever you choose, you'll enjoy yourself! Of course, this transporter is also supported by an individual sound and taillights and has the look of an extremely detailed model with dynamic numbers and textures.

This package includes 2 sessions for the ECML route allowing you to get on the road right away!

One vehicle - endless possibilities!
